

DPD-8212-59

1 December 1959

MEMORANDUM FOR THE RECORD

25X1A

SUBJECT: [REDACTED] Results

1. [REDACTED] visited this office and OSI on 30 November 1959 to discuss [REDACTED] results to date and the necessity for further detailed readout. [REDACTED] indicated that the analysis is approximately 90% complete, the portion remaining being essentially verification of results already derived. There is sufficient data available to satisfy DPD's requirements without any further extensive readout. It has therefore been agreed that [REDACTED] will proceed with writing a final report on the project. The report will include information on the collection system, the readout equipment and techniques, and the results. In conjunction with the preparation of this report, he will perform the remaining 10% of the analysis.

2. In discussions with OSI, [REDACTED] pointed out that he saw no need for further readout, which he considers "Gilding the Lily." The OSI people tacitly agreed to this suggestion.

3. After submission of the final report by [REDACTED] Operation [REDACTED] will be considered closed. Should any further work be desired, it will be strictly an OSI function.
